SUMMARY

Outstanding Data Science Technology graduate from Universitas Airlangga (GPA 3.75) with proven expertise in data analysis, machine learning, and programming (SQL, Python, R, Power BI, Excel). Demonstrated technical excellence through developing a CNN model for dental disease classification achieving 99% accuracy, leading the team to victory in the Bangkit 2024 Company Track Capstone Project in collaboration with GoDentist. Backed by professional Data Analyst and Data Science certifications from IBM and Google, combined with exceptional communication, problem-solving, and teamwork abilities, I am eager to leverage my comprehensive skill set and innovative mindset to deliver high-impact data-driven solutions in a Data Scientist or Data Analyst role.

PROFESSIONAL EXPERIENCE

Home Credit Indonesia x Rakamin Academy - Remote

Project-Based Virtual Intern : Data Science

March 2024 - April 2024

- Extracted high-value insights from complex data, generating actionable and evidence-based business recommendations for more informed decision-making.
- Developed advanced predictive models with 95% accuracy to assess customers' credit repayment ability, significantly improving enterprise risk management.
- Present comprehensive and measurable business recommendations to companies, aligning customer profiles with credit strategies to optimize company plans.

SF Group Services Enterprise - Remote

Python Developer

August 2023 - December 2023

- Developed a cutting-edge Python application that automates the extraction of top 20 SERP outlines and topics from Google, improving content research efficiency.
- Designed an advanced topic scoring system using TF-IDF algorithm and Chat GPT API integration, generating structured topic outlines that transform raw data into high-value content outlines.
- Created a comprehensive Python application that unifies scraping, topic analysis, and outline generation functions, automating content creation workflows and significantly increasing team productivity.

ID/X Partners x Rakamin Academy - Remote

Project-Based Virtual Intern : Data Engineer

May 2023 - June 2023

- Manage and optimize corporate databases through efficient import and restore processes, improving system performance and ensuring data integrity.
- Designed and implemented a new database structure using Fact and Dimension models, optimizing query performance and facilitating more in-depth data analysis.
- Created a complex Stored Procedure to generate sales summaries based on shipment status, improving efficiency for faster and more accurate business decision-making.

EDUCATION

Universitas Airlangga - Surabaya, Indonesia

Bachelor Degree in Data Science, 3.75/4.00

September 2020 - July 2024

- Awards: Best Team at Bangkit Company Track Capstone Project in collaboration with GoDentist, Best Graduate 1 Study Program Level at 244th Graduation Ceremony of Universitas Airlangga.
- Relevant courses: Data Science, Data Analyst, Database (Database Design & Database Programming with SQL), and Machine Learning.
- Actively participated in more than 10 campus events, such as competitions, webinars, and skills training.

ORGANIZATIONAL EXPERIENCE

Teman Ambiss

Staff of Academic Research Development

September 2023 - Maret 2024

- Designed and executed comprehensive college webinars, covering public, private, and international universities.
- Mentored and inspired over 25 prospective students in navigating their career and academic choices.
- Conducted cutting-edge academic research to improve educational standards and effectiveness.

Bisa.AI

Staff & Head of Event Organizer (Student Ambassador)

September 2021 - January 2022

- Introduced and popularized the BISA.AI and Perform platform among students, encouraging the adoption of cutting-edge technology in an academic environment.
- Designed, organized, and executed more than 5 quality educational webinars every month, consistently exceeding set targets.
- Conducted in-depth documentation and evaluation for each webinar, generating actionable insights for continuous improvement of educational programs.

UKM Bola Voli Universitas Airlangga

Staff & Head of Event

January 2021 - December 2022

- Guided Universitas Airlangga volleyball team as manager in the prestigious East Java Provincial Student Sports Week 2022.
- Devised a comprehensive plan for the inter-university volleyball tournament, maximizing team performance and event efficiency.
- Effectively managed 5 division members, ensuring task synchronization and target achievement according to initial agreement, demonstrating strong team management skills.

PROYEK

Home Credit Scorecard Model: Optimized marketing and customer retention strategies with in-depth data analysis, generated Random Forest model to predict credit risk with 95% accuracy, improved efficiency of loan approval process and reduced potential company losses.

Air Quality in Beijing 2013 - 2017: Conducted a comprehensive analysis of Beijing's air quality over 5 years, identifying key factors affecting PM2.5 and PM10 levels. The findings in this project provide valuable insights for the development of more effective air quality management strategies in major cities.

Winning Space with Data Science: Analyzing SpaceX operations, identifying optimal launch locations and success trends, and developing a predictive classification model with 88.89% accuracy, provides critical insights for competition in the commercial space launch industry.

Technology Trends Analysis: Conducted a comprehensive analysis of current trends in software development and web design to identify critical skills of the future. In addition, the project analyzed popular IDEs and the most in-demand technologies, providing strategic insights for educators, policymakers, and IT industry professionals.

Content Synthesis With Python: Designed an integrated Python-based AI system for digital content research automation, incorporating advanced web scraping techniques, topic analysis using TF-IDF, and content generation with Chat GPT API. The project transformed raw SERP data into quality structured outlines.

Classification of Dental Diseases: Developed a dental AI model with 99% accuracy, using EfficientNetB3 CNN to identify 4 dental conditions and non-dental images. This innovation has the potential to significantly improve the efficiency and accuracy of dental disease diagnosis.

TAMBAHAN

Technical Skills: Python, SQL, R Programming, Power BI, Google Looker Studio, Statistics, Mathematics, Excel, SPSS, Analytics, Machine Learning Algorithms, Deep Learning, Data Mining, Data Cleaning, Data Pre-Processing, Data Wrangling, Data Visualization, Data Storytelling.

Soft Skills:

- Utilized effective communication across multiple teams resulting in a 25% increase in team performance efficiency.
- Devised an innovative solution that reduced processing time by 30% on a python app project.
- Led a multidisciplinary team of 10+ members, driving 150% target achievement by hosting more than 5 quality webinars per month.

Languages: Native proficiency in Indonesian and basic to intermediate proficiency in English.

Certifications: bit.ly/course-cert-ryan

- Natural Language Processing (2024)
- DeepLearning.AI TensorFlow Developer (2024)
- Machine Learning (2024)
- Google Data Analytics Specialization (2024)
- IBM Data Science (2024)
- IBM Data Analyst (2023)
- DII.

Trainings: bit.ly/train-cert-ryan

- **Database (Database Design & Database Programming with SQL)** August 2024 - October 2024
Fresh Graduate Academy Digital Talent Scholarship 2024 (Pusbang Proserti Kominfo)
- **Cohort Bangkit Academy 2024 Batch 1, Machine Learning Path** February 2024 - July 2024
Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka
- **Data Science** February 2024 - April 2024
Fresh Graduate Academy Digital Talent Scholarship 2024 (Pusbang Proserti Kominfo)
